

ZENZA®

*Lookbook 2024*

## About us

When we create our collections we always ask ourselves if something adds *soul* to a room. We are always looking for ways to make a house feel like a home. It's all about making the *mood* right, understanding how to create an atmosphere and, for us, the art of mastering *light*. That's what Zenza is all about and what we love to do.

We truly believe in the magic of good vibes. We work *ethically* and fair with our artisans. It's important to us that they can thrive and grow with us. We offer microfinance-loans, for example, so they can be owner of their workshop and create work and independence for themselves. We innovate together, but we also keep *traditions* alive through our products.

So many talented hands and creative minds have worked with us to make this new collection, it became a tribute to *handwork!* Some of our newest pieces are made from really special materials, nature's finest finds!

Getting curious?

We love to show you our creations in this brand-new lookbook. and we are looking forward to another *Zenzational* season together!

*With love,*  
The Zenza team

# Home textile

Sabra is the name of this *vegetable silk* from Morocco.

Aloe vera or agave cactus is used to produce these fibres and they are dyed with natural ingredients. An *artisanal* process.

The clean and abstract motives are from Berber origin, often symbolising fertility and protection.

# Lighting

Every lamp and every *material* has a story,

be it a brass, alabaster or loofah lamp.

They are all unique and made with *love!*

Probably you know the *loofah* as a sponge for a good body scrub?

This vegetable has an incredibly detailed surface. It looks like *coral* and other precious materials from the sea.

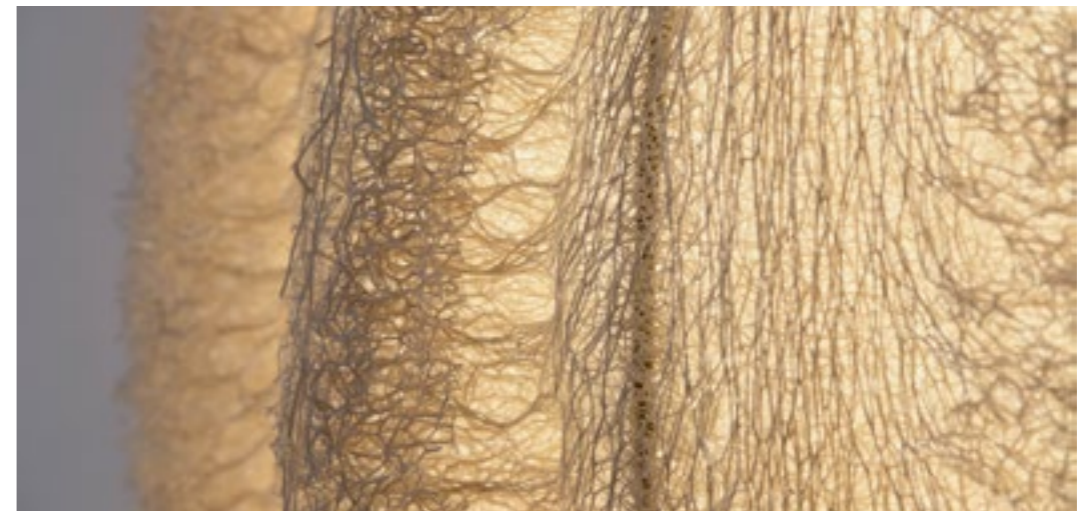

We gave them a new fabulous life as poetic lampshades. Often designs and patterns that are harvested directly from *nature* are the best!

Loofah Gab XL Naturel

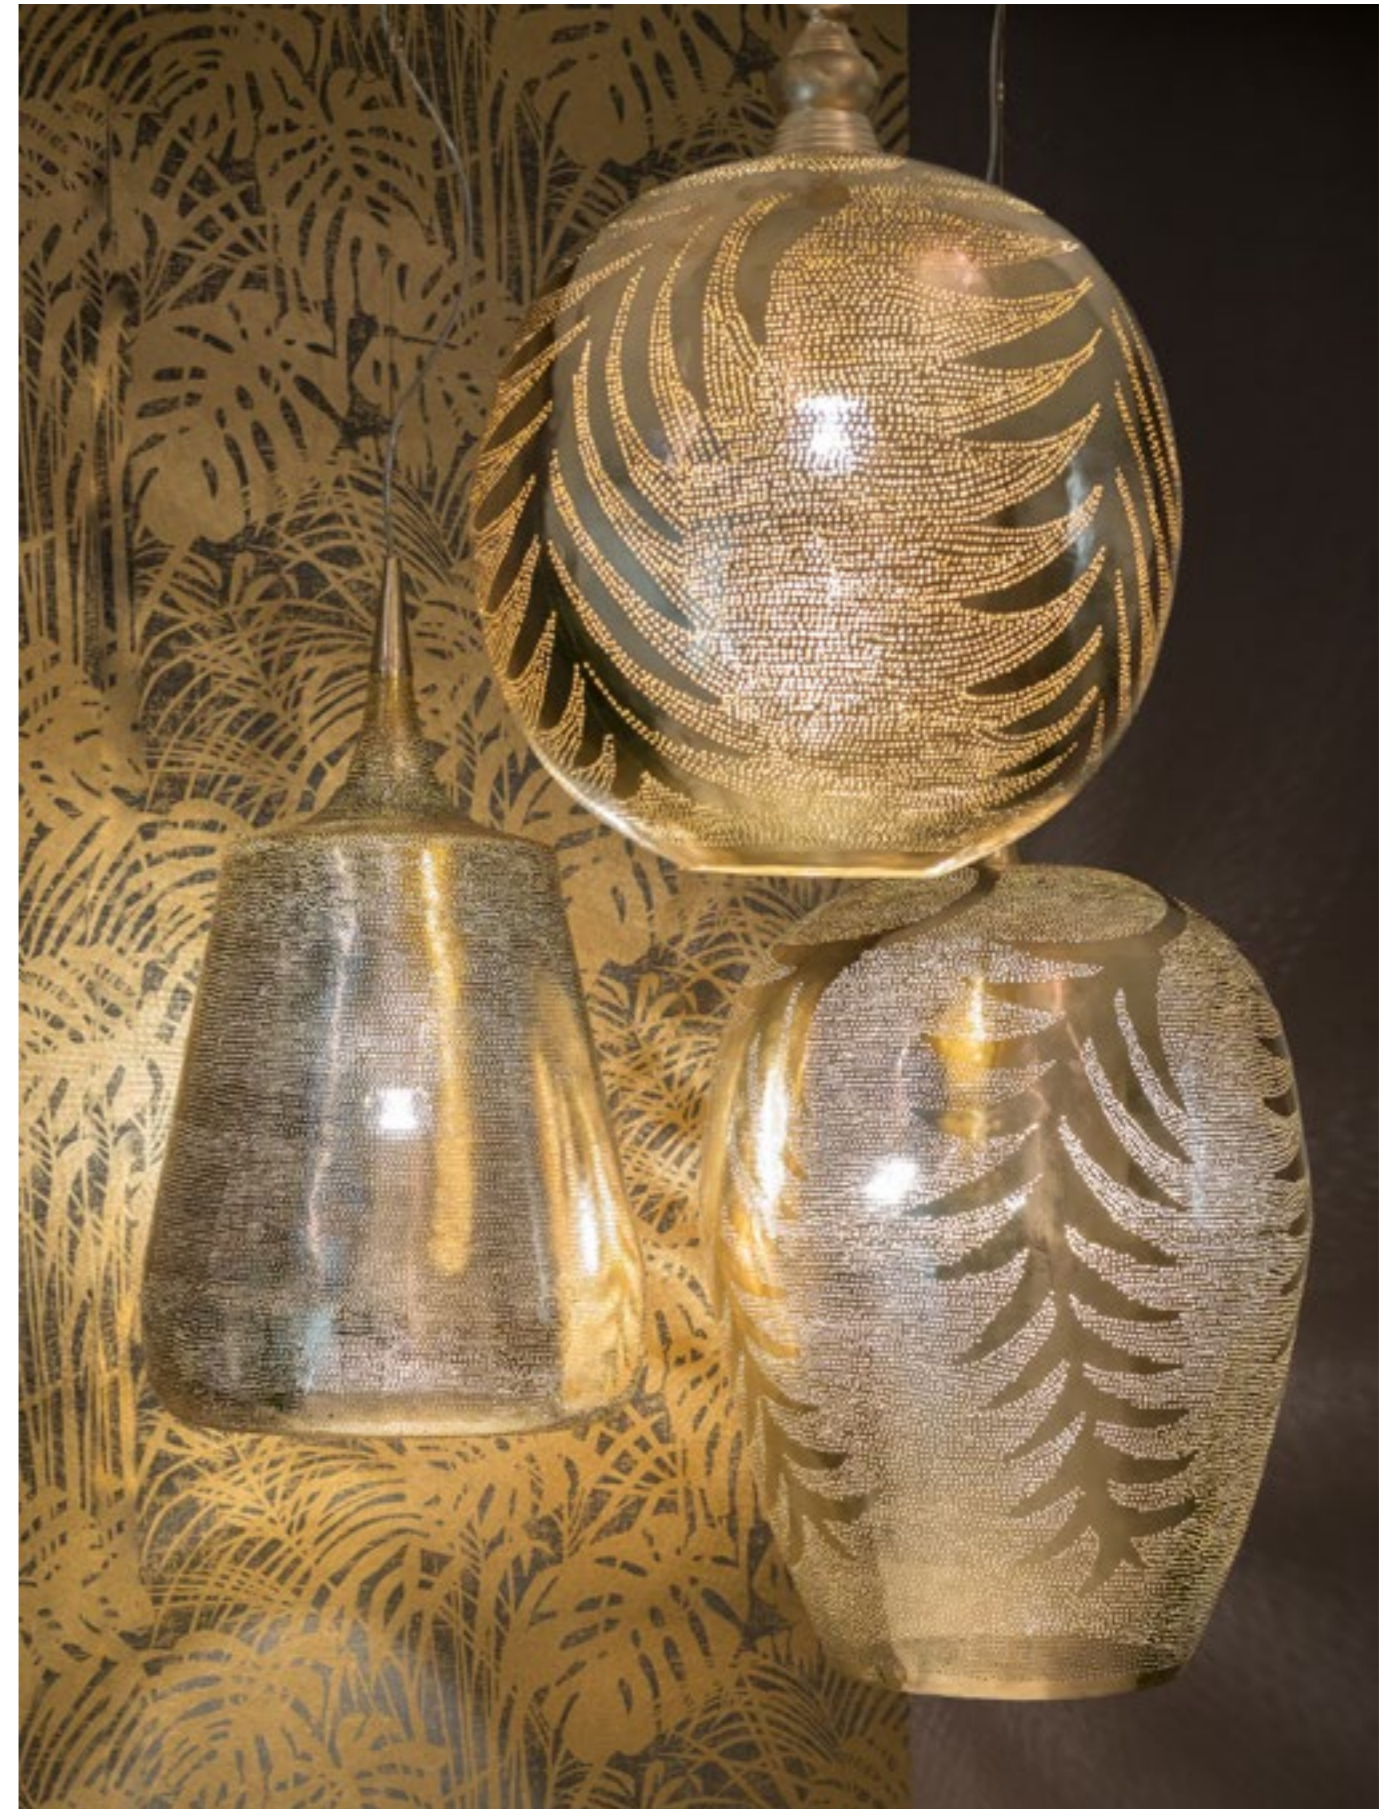

Loofah Large Naturel

The patterns you see in the brass Zenza Lights are punctured by hand,  
without the use of any stencils. Therefore each lamp is *unique*
